

MOC6066

Developing Managed Applications for Windows Mobile 6

MODULE 1: INTRODUCTION TO .NET APPLICATION DEVELOPMENT FOR WINDOWS MOBILE 6.

- ✓ Overview of Windows Mobile 6
- ✓ Introduction to Managed Application Development

MODULE 2: DEVELOPING ADAPTABLE APPLICATIONS FOR DIFFERENT DEVICE CAPABILITIES.

- ✓ Implementing Resolution-Aware and Orientation-Aware Applications
- ✓ Handling User Input
- ✓ Designing a Single Application for Multiple Platforms

MODULE 3: CREATING A LOCAL DATA STORE BY USING SQL SERVER 2005 COMPACT EDITION.

- ✓ Introduction to SQL Server 2005 Compact Edition
- ✓ Designing SQL Server 2005 Compact Edition Databases in Visual Studio 2005
- ✓ Accessing Data In SQL Server 2005 Compact Edition Databases

MODULE 4: SYNCHRONIZING SQL SERVER 2005 COMPACT EDITION WITH SQL SERVER 2005.

- ✓ Configuring Replication in SQL Server 2005
- ✓ Synchronizing Data Between SQL Server 2005 Compact Edition and SQL Server 2005 by Using Merge Replication

MODULE 5: DEVELOPING LOOSELY CONNECTED WINDOWS MOBILE APPLICATIONS.

- ✓ Detecting Network Connection Availability
- ✓ Calling Web Services In a Loosely-Connected Application

MODULE 6: PLANNING AND IMPLEMENTING DEVICE AND APPLICATION SECURITY.

- ✓ Identifying Security Threats and Counter-Measures for Windows Mobile 6-Based Applications
- ✓ Implementing Application Security Features

MOC6066

Developing Managed Applications for Windows Mobile 6

MODULE 7: ENHANCING WINDOWS MOBILE 6-BASED APPLICATIONS WITH MULTIMEDIA AND LOCATION-AWARE CAPABILITIES.

- ✓ Enhancing Windows Mobile 6-Based Applications with Multimedia
- ✓ Creating Location-Aware Applications

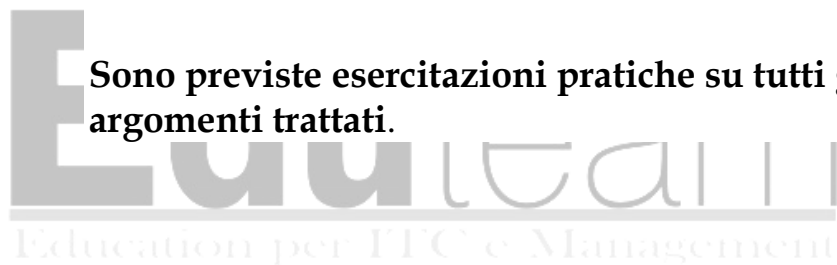

MODULE 8: INTEGRATING APPLICATIONS WITH OFFICE MOBILE.

- ✓ Accessing Office Mobile Entities from an Application

MODULE 9: PACKAGING AND DEPLOYING APPLICATIONS.

- ✓ Building a Cab File for an Application by Using Visual Studio 2005
- ✓ Applying a Digital Signature to a Cab File

Sono previste esercitazioni pratiche su tutti gli argomenti trattati.

Education per TIC e Management
